LEAFLET

Feb—Mar
Volume 3(2016-17)
Issue No:5

“We all live with the objective of being happy; our lives are all different and yet the same”-
Anne Frank

Laptops are common place in university classrooms.in light of cogntive psychology theory on costs associated with multitasking ,we examined the effects of in-class laptop use on student learning in a simulated classroom.we found that participants who multitasked on a laptop during a lecture scored lower on a test compared those who did not multitask, and participants who were in direct view of a multitasking peer scored lower on a test compared to those who were not .the results demonstrate that multitasking on a laptop poses a significant
