

A 2 day workshop on AWS technical Essentials in association with AWS, APSSDC from 12-10-17 to 13-10-17.

Article on Cloud Computing by K.Monisha ,IV CSE

In a cloud computing system, there's a significant workload shift. Local computers no longer have to do all the heavy lifting when it comes to running applications. Hardware and software demands on the user's side decrease. The only thing the user's computer needs to be able to run is the cloud computing system's interface software, which can be as simple as a Web browser, and the cloud's network takes care of the rest.

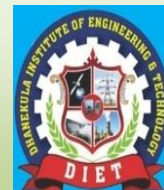

A view to remember : Guest Lecture on FLAT by Ramesh ,10-2-2018.

NETWORK SECURITY: HISTORY, IMPORTANCE, AND FUTURE By-

Network security has become more important to personal computer users, organizations, and the military. With the advent of the internet, security became a major concern and the history of security allows a better understanding of the emergence of security technology. The internet structure itself allowed for many security threats to occur. The architecture of the internet, when modified can reduce the possible attacks that can be sent across the network. Knowing the attack methods, allows for the appropriate security to emerge. Many businesses secure themselves from the internet by means of firewalls and encryption mechanics.

Usha.V (3rd CSE-B)

Achievements: Our student from 2nd C.S.E-A, Ms.Jahnavi.A has achieved 3rd prize of 15,000/- in Engineer Ka Samgram held by Usha Rama Engineering Collage.
