Tech News:

ISRO Successfully launched a record of 104 satellites into polar sun synchronous orbit. Satellites include India's earth observation satellite Cartosat-2 series and 101 foreign nano satellites from the US, Israel, UAE, Netherland, Kazakhstan, Switzerland.

In its thirty ninth flight (PSLV-C37), ISRO's polar satellite launch vehicle successfully launched the 714Kg cartoSat-2 series satellite along with 103 co-passenger satellites from Satish Dhawan Space Centre SHAR, Sri hari kota.

This is the thirty eight consecutively successful mission of PSLV. The total weight of all the 104 satellites carried on-board PSLV-C37 was 1378Kg. All 104 satellites equipped with panchromatic and multi spectral cameras ,the 664Kg CartoSat -2 will provide remote sensing services similar to that of its predecessors. Images from the satellites will be used for cartographic applications , urban and rural applications, costal land use and regulation , utility management like road network monitoring , water distribution, creation of land use maps and GSI applications.

You have to grow from the inside out. None can teach you, none can make you spiritual. There is no other teacher but your own soul.

-Swami Vivekananda
